Industrial Door Solutions are the UK's premier industrial door repair and maintenance company specializing in professional maintenance and repair of all types of industrial doors, automatic doors and loading bay systems.

At IDS we are happy to take on small or large contracts and tailor our services to exactly meet the requirements of the client so whatever environment you work in or whatever industrial door solutions you need, we can help!

Customer satisfaction is our premier priority, which is why we approach all our contracts on an individual basis to ensure that we provide the most efficient service possible. We provide our clients with an all-encompassing solution to their industrial door needs, whether that is design and installation of new doors or maintenance of existing doors or other machinery.

All our doors and other equipment undergo rigorous checks to guarantee their effectiveness and longevity. In addition our fully qualified, highly skilled engineers are backed by comprehensive technical support across the gamut of our product range.

Our staff take great satisfaction in providing a full repair and maintenance package designed to maintain doors to the highest standards and provide clients with peace of mind when it comes to safety and security. IDS is an ISO 9001 registered business and an approved trading partner of Hormann, so give us a call on **0845 270 5622** or email and find out more about our extensive range of services.

If you are looking for a reliable supplier we also supply an extensive range of doors and other equipment including:

- Roller Shutters
- Sectional Overhead Doors
- High Speed Doors
- Auto Doors
- Fire Doors
- Domestic Garage Doors

## How can we help you?

At Industrial Door Solutions customer satisfaction is our premier priority, which is why we approach all our contracts on an individual basis to ensure that we provide the most efficient service possible. We provide our clients with an all-encompassing solution to their industrial door needs, whether that is design and installation of new doors or maintenance of existing doors or other machinery.  
High Speed Doors

From the low priced basic model to the more robust versions, the special merits of our high speed doors are top grade quality material, and safe reliable long term functionality.

# Roller Shutters

1

Strong and efficient, roller shutters are suitable for a wide range of applications, from small security shutters to large industrial uses. They combine robustness and long term reliability with security.

Operation can be manual, self coiling, hand chain (via a geared hand chain hoist) or, for larger doors with frequent usage, through incorporated electric motors.

The versatility of the roller shutter means that options such as polyester powder coating and plastisol parts are available.

Canopy covers and fascias can be supplied to cover the coiled shutter and motor.

Other options, such as perforated or punched lath, wicket gates, wind anchoring for extra strength and internal/external installations, make the roller shutter appropriate for every application.

## Options

- The versatility of the roller shutter means that options such as polyester powder coating and plastisol parts are available. Canopy covers and fascias can be supplied to cover the coiled shutter and motor.
- Other options, such as perforated or punched lath, wicket gates, wind anchoring for extra strength and internal/external installations, make the roller shutter appropriate for every application.

# Sectional Overhead Doors

# 2

Combine top quality and advanced technology with high insulation requirements. Maximum vision and elegance can also be achieved.

These doors can be manually operated (via a pull down rope or geared hoist) or automatically by a range of motors and control systems.

Doors are made up of 40 mm thick insulated panels which are formed from high density, fire resistant, CFC free urethane cores. Incorporating a unique finger safe profile, the panels provide a u-value of 0.60 w/mzk, which is higher than the requirements for current building regulations.

## Options

- Available in wide a range of colours and materials, including HP200 or architectural polyester.
- Steel or aluminium facings.
- Outside facing panel sheets can be stucco embossed with polyester finish or smooth with plastisol finish, in colours from our standard range.
- Vision panels are available in a variety of sizes and patterns, acrylic double and fully sealed. Sectional overhead doors provide solutions for many different applications.

# High Speed Doors

# 3

From the low priced basic model to the more robust versions, the special merits of our high speed doors are top grade quality material, and safe reliable long term functionality.

The doors are used for both internal and external applications to optimise the flow of traffic, improve environmental conditions and save energy.

This wide range includes a high speed door for virtually any application.

Our high speed doors also comprise of a knock out bottom rail system which ensures minimal damage and cost should the door be struck by any vehicles. The bottom rail is designed to be re installed after impact damage and the door re set and then normal operation can be resumed.

## Options

- Curtain thickness varies from 1.5 mm to 4 mm.
- Operation speeds are from 0.5 m/s to 1.5 m/s.
- Curtains can be fully transparent or just partial.
- Both external and internal applications can be achieved, with maximum opening sizes of 5000 mm x 5000 mm.
- All doors are fully automated and can incorporate devices such as radar or infra-red movement detections, induction loops, radio remote controls, traffic lights and an air locking system.
- A wide range of colours are available.
- Now introducing the photo light grille system.

# 5

# Steel Hinged Doors

# 4

General purpose door sets include fire resistant and acoustic versions plus a range of high security doors. They are available complete with matching frames, to suit different wall applications. Both single and double leaf doors are available in standard and purpose made sizes.

## Options

- Door sets can be made to suit any opening sizes.
- Polyester powder coating is available in any RAL or BS colours.
- Door leaves can incorporate louvre panels or window sections.
- Standard door sets come with frame, threshold.

Fire resistant roller shutters are used when effective fire resistance coupled with an unobtrusive shutter is required.

They are designed for use between compliant walls and fire rated compartments, to restrict the passage of fire from one area to another.

All fire shutters are manufactured to ISO 9002 standards and can provide up to 4 hours' fire resistance which is certified by The Loss Prevention Certification Board.

## Options

- Fire resistant roller shutters can be manufactured to suit any size application, from small server windows to larger industrial openings (up to 7000 mm x 7000 mm).
- All fire shutters are manufactured to ISO 9002 standards and can provide up to 4 hours fire resistance. certified by The Loss Prevention Certification Board.
- Shutters can be manual. self coiling activated (via a fusible link and dropper bar) or, for the larger industrial fire shutter, via electric motors linked to the fire circuit of the building, activating a controlled descent.
- Shutters can be polyester powder coated to suit most applications.

# Auto Doors

# 6

Our products range from single sliding doors, double sliding doors to concertina doors. The doors are bespoke manufactured to suit the specific opening and come in several different options, colours and glazing.

We also supply a vast array of door access control which tailors the needs for all disabled access and adheres to all current legislations.

# 8

# Other Products

# 7

## Gate Systems

All our gate systems are bespoke to each individual site depending on the sizes and requirements. These can be sliding gates, swing gates or even manual pedestrian gates.

We supply a vast array of operators and gate entry systems again depending on the circumstances. All our electrically operated gate systems come complete with all built in safety electrical systems and adhere to all current legislations.
